

2016 FIA Formula E HKT Hong Kong ePrix Fact Sheet

What is Formula E?	Formula E is the world's first fully-electric racing series, where energy, entertainment and the environment come together in urban street racing. It is top-flight international motorsport minus the emissions, driving a more sustainable future — and it's coming to the heart of Hong Kong on 8-9 October 2016.
Governing body:	Formula Electric Racing (Hong Kong) Limited
Drivers:	Announcement on 24 June 2016
Date:	8 - 9 October 2016 (Saturday - Sunday)
Location:	Central Harbourfront, Hong Kong
Racing teams:	10 teams, each with two drivers (with the addition of Jaguar for season three)
Race track:	Bespoke urban circuit approximately 2km in length 10 turns (2 Hairpin bends) Main straight on Lung Wo Road (555m)

Race course:

The race: The Formula E Hong Kong ePrix will consist of **practice**, **qualifying**, **super pole** and the **race**, all combined in a single day event format.

There are two **practice** sessions that run for 45 and 30 minutes, with two cars available per driver at full power (200kW/ 270bhp).

The **qualifying** session determines grid positions six to 20, with full power available throughout.

The **super pole** determines grid positions one to five in a one-lap shootout, with the pole sitter earning an additional three championship points.

The **race** lasts approximately one hour from a standing start. Cars are restricted to a maximum of 170kW, but the three FanBoost winners get a temporary power increase (see below). One pit stop is mandatory.

Points system: Formula E points are awarded using the standard FIA points system. An additional three points are awarded to the pole sitter and an additional two points are awarded to the driver who sets the fastest lap.

FanBoost: Fans can vote for their favourite driver by using the official Formula E website, apps or social media. The three drivers with the most votes win FanBoost for an additional 100kJ of energy. FanBoost can be deployed in the second car only and is to be used in a power window of 180kW and 200kW. When deploying FanBoost it can only be used once, a series of short bursts will not be possible.

Entertainment & activities:

Grandstand	eVillage
<ul style="list-style-type: none"> ● Access the eVillage area ● Enjoy food and beverage options and partake in activities at the eVillage ● View the racing from seats overlooking the track 	<ul style="list-style-type: none"> ● Catch the action live on big screens ● Meet the racers in person ● Experience futuristic interactive booths with latest E technology, EV cars and interactive gaming ● Enjoy a delicious array of dining options
