About the Avenue of Stars

The Avenue of Stars, sponsored and built by New World Development, was first opened in 2004 to pay tribute to the region's most celebrated figures in the movie industry. Located along the stunning Victoria Harbour, it has become a must-visit Hong Kong destination for both local and international visitors.

In 2019, New World Development commissioned the revitalisation of the Avenue of Stars, incorporating new features such as arts and cultural elements, a wide range of amenities, and eco-friendly designs. With its iconic statues and over 100 celebrity handprints, the Avenue of Stars, situated within Victoria Dockside, has transformed into a world-class waterfront landmark that integrates film, culture and leisure.
